DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6,18-23 rejected under 35 U.S.C. 102(b) as being anticipated by Gable et al (7016833).

As per claim 1, Gable et al (7016833) teaches a speaker authentication system (col. 2 lines 18-23), comprising: an input receptive of speech spoken by user speech from a user (as

Art Unit: 2626

accepting input speech (Fig. 3); an extraction module receives speech from the input and extracts glottal source parameters indicative of a glottis of the user from the speech (as deriving glottal parameters --col. 2 lines 23-30) an authentication module receives glottal source parameters from the extraction module and authenticates the user by comparing the glottal source parameters to glottal source parameters stored in a data store (as storing the parameters and using the parameters for speaker verification – col. 2 lines 42-52).

As per claims 2-4, Gable et al (7016833) teaches glottal source parameters including spectral, voicing content, and noise (col. 3 lines 53-65)) with using glottal information to determine/model the input speech, and performing a comparison to the input speech (col. 17 line 50 – col. 18 line 30)).

As per claims 5,6, Gable et al (7016833) teaches driving the excitations using phase fluctuating/shifting parameters, as well as harmonic/subharmonic driven excitation models (col. 7 lines 34-59).

Claims 18-23 are method step claims that are implemented in the apparatus claims of claims 1-6; as such, claims 18-23 are similar in scope and content to claims 1-6, and are therefore rejected under similar rationale as presented above with respect to claims 1-6.

Response to Arguments

Art Unit: 2626

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Examiner notes the use of the Gable reference to address the new claim scope.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Opsasnick, telephone number (571)272-7623, who is available Tuesday-Thursday, 9am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Richemond Dorvil, can be reached at (571)272-7602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
